

* 2x24x1RU 1/4" Long-Frame Panel with 620A SKINI Jacks

* The 620A 1/4" Long-Frame Jack is B-Gauge compatible. This jack is mechanically and electrically the same as all other jacks we manufacture, the only difference is the narrower 620A SKINI jack profile

* We've simply taken the 620A jack out of our 32 per row patchbay and incorporated it into a 2x24x1RU panel
