

- \* 2x26x1RU 1/4" Long-Frame Panel with 620A SKINI Jacks
- \* The 620A 1/4" Long Frame Jack is B-Gauge compatible. This jack is mechanically and electrically the same as all other jacks we manufacture, the only difference is the narrower 620A SKINI jack profile
- \* We've simply taken the 620A jack out of our 32 per row patchbay and incorporated it into a 2x26x1RU panel
